Professor J. Satterly,

Department of Physics.

Dear Professor Satterly:

At a meeting of the Military Committee held last Friday evening we went fully into the question of exemptions. I have also made further inquiry with regard to the disappearance of so many students from the General Course in Physics. I can, however, find no evidence that there has been any definite advice given against Physics. The principle has been laid down and has been endorsed by the Committee, and seems to me to be thoroughly reasonable, that a student who enters the General Course with a star in any one subject, such as Latin or Mathematics, should be required to take that subject in the first year. The new condition which you are to lay down as to Physics being necessary in the first year for those who are to take it in the second might have made a difference in a few cases had it been known. Henceforward, however, it is probable that there will be fewer exemptions and that a bonus of 10% all round will be given to students who are in the C.O.T.C.

As I said however before I cannot find evidence that Physics has been discriminated against by any of the Registrars of the Colleges nor by the Registrar of the University.

Yours sincerely,

President.

The President
Dear Sir

To whom must I send my bill of $70 for extra work done in the last Summer Session? At great inconvenience to myself and at the earnest request of Dr Abbott and Sheri I undertook to give the 2nd yr General Students their 1st year Practical Physics after the close of the ordinary summer session. I have yet to learn whether the work which they did has been accepted by the powers that be as equivalent

to their 1st years Practical Work,
but the degrading part of ~~the~~ my
work is that I have to be
Continually dunning the Extension
people for my salary. I have
received no answer to my last
letter to Dr Abbott.
The salary for the regular summer
person I received in the late
summer. It is with regard to
the extra work that I am writing
to you now. I am sorry to have to
trouble you about it but others
seem so unbusinesslike that I
can see no help from it.

Yours sincerely
John Satterly

January 6th, 1917

Professor J. Satterly,

Physics Building.

Dear Dr. Satterly:

I have got in touch with Dr. Abbott, and he has promised to send me a letter setting forth a recommendation with regard to the payment for extra work in the Summer Session. As soon as I receive it I will take it up with the Board of Governors.

Yours sincerely,

President.

January 15th, 1917

Dr. Satterly,

Physics Building.

Dear Dr. Satterly:

At the meeting of the Senate on Friday night I got permission to have the matter of the authorisation of your courses referred for final action to the Council of the Faculty of Arts, so that I hope your financial arrangement with Dr. Abbott last summer will be settled. I regret that it has been delayed so long.

Yours sincerely,

President.
